Tips on Peripheral Vision Exam:

Peripheral vision exam by confrontation is simple procedure. Position yourself so that your face is directly in front and on the same level with the patient, about 2 feet away. Ask the patient to cover one eye and to look at your eye directly opposite. Close your other eye so that your own visual field is roughly superimposed on that of the patient. Bring a pencil or other small object (light) from behind and from the periphery slowly into the patient's field of vision. Ask the patient to indicate when the object appears. Estimate in degrees the point where the patient sees the object to the point where the patient is looking directly ahead. Test the other eye in the same manner. Lack of adequate or impaired peripheral vision should be given special consideration.
